HARD COATINGS

Hard coating processes

Plasma diagnostic studies of the activated reactive evaporation process 1
C. V. Deshpandey, B. P. O'Brian, H. J. Doerr, R. F. Bunshah (Los Angeles, CA, U.S.A.) and D. Hofmann (Hanau, F.R.G.)

Some fundamental aspects of glow discharges in plasma-assisted processes 17
K. S. Fancey and A. Matthews (Hull, U.K.)

Principles of plasma-activated chemical vapor deposition. 31
A. Inspektor-Koren (Beer-Sheva, Israel)

Extended Abstract: Optical interference effect in the laser chemical vapor deposition of SiC 49
F. Shaapur (Hopewell Junction, NY, U.S.A.) and S. D. Allen (Los Angeles, CA, U.S.A.)

Zirconium nitride films prepared by cathodic arc plasma deposition process 53
P. C. Johnson and H. Randhawa (Boulder, CO, U.S.A.)

Hard coatings of TiN, (TiHf)N and (TiNb)N deposited by random and steered arc evaporation 63
S. Boelens and H. Veltrop (Venlo, The Netherlands)

High rate reactive sputtering process control. 73
W. D. Sproul (Des Plaines, IL, U.S.A.)

Reactive magnetron sputtering of TiN: Analysis of the deposition process 83
J. Danroc, A. Aubert and R. Gillet (Grenoble, France)

Applications of hard coatings

Deposition and properties of multicomponent hard coatings 91
U. König (Essen, F.R.G.)

Knowledge-based expert systems in surface coating and treatment selection for wear reduction 105
C. S. Syan, A. Matthews and K. G. Swift (Hull, U.K.)

Comparison of cutting performance of ion-plated NbN, ZrN, TiN and (Ti,Al)N coatings* 117
J. M. Molarius, A. S. Korhonen, E. Harju (Espoo, Finland) and R. Lappalainen (Helsinki, Finland)

Turning tests of high rate reactively sputter-coated T-15 HSS inserts 133
W. D. Sproul (Des Plaines, IL, U.S.A.)

Performance of TiN-coated tools in wood cutting 141
S. Osenius, A. S. Korhonen and M. S. Sulonen (Espoo, Finland)

Cathode-spot arc coatings: physics, deposition and heating rates, and some examples 153
R. L. Boxman and S. Goldsmith (Tel Aviv, Israel)

*Recipient of the Bunshah award for the best paper in its Symposium.

Effect of crystallographic orientation on erosion characteristics of arc evaporation titanium nitride coating 169
J. A. Sue and H. H. Troue (Indianapolis, IN, U.S.A.)

Hard tribological coatings and modified surfaces

Friction and wear behaviour of thermally sprayed nichrome–WC coatings 183
J. Lira Olivares (Caracas, Venezuela) and I. C. Grigorescu (Los Teques, Venezuela)

The wear and erosion resistance of hard PVD coatings 191
D. S. Rickerby (Didcot, U.K.) and P. J. Burnett (Chester, U.K.)

Wear of ion-plated hot-working tools. 213
U. K. Wiiala, S. O. J. Kivivuori, J. M. Molarius and M. S. Sulonen (Espoo, Finland)

Mechanical strength and tribological behaviour of ion-beam-deposited boron nitride films on non-metallic substrates 221
K. Miyoshi, D. H. Buckley, J. J. Pouch, S. A. Alterovitz and H. E. Sliney (Cleveland, OH, U.S.A.)

TRIBOLOGICAL COATINGS/SURFACE MODIFICATIONS

Reduction of friction through coatings/surface modifications

Reactions between 52100 steel and tricresyl phosphate neat and mixed with hydrocarbon oil 235
F. Arezzo (Little Falls, NJ, U.S.A.) and R. L. Moore (Edison, NJ, U.S.A.)

Extended Abstract: Coatings for friction and wear control at high temperatures . . . 243
H. E. Sliney (Cleveland, OH, U.S.A.)

Erosion/corrosion resistance through coatings/surface modifications

The effect of processing parameters on the microstructure and erosion resistance of $NiCr_3C_2$ coatings 245
J. J. Wert, D. M. Baker and T. M. McKechnie (Nashville, TN, U.S.A.)

Sputter-coating of Ti–6Al–4V with Inconel 617 for erosion resistance. 267
M. Emiliani, M. H. Richman (Providence, RI, U.S.A.), R. Brown and O. Gregory (Kingston, RI, U.S.A.)

Erosion–corrosion of protective scales on alloy steels 285
A. V. Levy and B. Wang (Berkeley, CA, U.S.A.)

Cavitation-erosion resistance of ion plated Cr–TiN multilayer coatings. 301
T. Odohira, T. Wada, R. Ebara and T. Kobayashi (Hiroshima, Japan)

Study of the behaviour in acidic solution of titanium and TiN coatings obtained by cathodic sputtering 309
Y. Massiani, J. Crousier (Marseille, France), L. Fedrizzi, A. Cavalleri and P. L. Bonora (Trento, Italy)

Protective coatings/surface modifications for severe environments

Plasma-sprayed TiC protective coatings for fusion devices: coating fabrication criteria 319
S. Dallaire (Quebec, Canada) and R. G. Saint-Jacques (Quebec, Canada)

The need for microstructural control in coatings exposed to severe environments . . 327
E. L. Courtright (Washington, DC, U.S.A.)

Corrosion resistance of chromium carbide coatings in oxygen–sulfur environments 341
K. Natesan (Argonne, IL, U.S.A.) and R. N. Johnson (Richland, WA, U.S.A.)

CURRENT INDUSTRIAL PRACTICES: INDUSTRIAL EQUIPMENT AND APPLICATIONS

Coating materials and applications technology

Technical Note: Improved universal powder mass flow control for thermal spray applications 353
D. E. Crawmer, R. L. Bartoe and J. Kramer (Columbus, OH, U.S.A.)

Technical Note: Optical properties of reactively evaporated SiO_x films 367
S. Schiller and G. Beister (Dresden, G.D.R.)

Technical Note: Cryogenic vacuum pump characteristics in reactive d.c. magnetron sputtering processes 379
K. A. Taylor, C. T. Wan, G. T. Susi and D. L. Chambers (Hilliard, OH, U.S.A.)

Technical Note: Comparison of film density, stoichiometry, optical and electrical properties of thin metal oxide films produced by reactive d.c. magnetron sputtering and electron beam evaporation techniques 393
B. P. Hichwa and G. Caskey (Holland, MI, U.S.A.)

Technical Note: A gyro spin axis bearing performance using titanium carbide coated balls 401
F. Brown McKee (Woodland Hills, CA, U.S.A.)

Production coating equipment

Invited Paper: Reactive d.c. high-rate sputtering as production technology* 405
S. Schiller, U. Heisig, Chr. Korndörfer G. Beister, J. Reschke, K. Steinfelder and J. Strümpfel (Dresden, G.D.R.)

Technical Note: Design and performance of a moveable post-cathode magnetron sputtering system for making PBFA II accelerator ion sources 425
D. M. Mattox, R. E. Cuthrell, C. R. Peeples and P. L. Dreike (Albuquerque, NM, U.S.A.)

Technical Note: Design of a production-scale process for coating composite structures 433
M H. Headinger and M. J. Purdy (Brecksville, OH, U.S.A.)

Ancillary and support equipment

Technical Note: New computerized shot peening machines improve reliability of dynamically loaded coated parts. 443
J. S. Eckersley and R. Kleppe (Paramus, NJ, U.S.A.)

SURFACE MODIFICATION USING DIRECTED ION BEAMS

Developments in ion-assisted coatings 453
G. Dearnaley (Didcot, U.K.)

Composition, structure and wear resistance of Ti–6Al–4V implanted with carbon or boron to high doses 469
R. N. Bolster, I. L. Singer and R. G. Vardiman (Washington, DC, U.S.A.)

---

*Recipient of the Bunshah award for the best paper in its Symposium.

Tribological behaviour of some alloys after surface modification using ion beam techniques 479
P. Moine, O. Popoola, J. P. Villain, N. Junqua, S. Pimbert, J. Delafond and J. Grilhe (Poitiers, France)

Surface chemistry and mechanical behaviour of silicon carbide and silicon nitride implanted with titanium to high fluences and high temperatures. 487
I. L. Singer (Washington, DC, U.S.A.)

Effects of ion implantation in cemented carbides and cobalt alloys 501
U. König (Essen, F.R.G.) and G. K. Wolf (Heidelberg, F.R.G.)

Enhanced thermal emittance of space radiators by ion-discharge chamber texturing . 511
M. J. Mirtich and M. Kussmaul (Cleveland, OH, U.S.A.)
